TECHNICAL SPECIFICATIONS

STAGE

Minimal measurement: 8 x 6 m. Mini. Height > 4m

The stage will have to be able to support the weight mentioned in the stage plan

3 electrical plugs frontstage with a minimal power of 20 KW and 60 KW.

1 : 2m x 2m platform (percussion)

BACKLINE

6 conventional monitors + if possible... 2 side fills

We assume that there is a well sized PA system provided for the concert room with sufficient power to supply a clean and undistorted 110dB SPL RMS to the mixing desk and a powerful and feedback-proof monitor system.

It is very important that each musician have their own monitor speakers with separate mixes. For really large venues we will need two sidefills.

SOUND SYSTEM MUST BE READY FIVE HOURS BEFORE THE DOORS OPEN TO AUDIENCE OR SIX HOURS BEFORE THE SHOW.
